PRESENTATION											REPORT 1													
Mark Allocation	Key Assessment		Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment		Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	
3.00%	Presenter's General Preparation		7	2.1	6	1.8	9	2.7	7.5	2.25	Well-prepared, mostly clear, minor improvements needed.	3.00%	Introduction		9	2.7	8	2.4	8	2.4	7	2.1	* Abstract Keywords are missing from the abstract. * Problem Statement - Length and readability: Currently dense; would benefit from shorter sentences or bullet points for clarity. * Focus: Too many technical details (Bluetooth, Wi-Fi, GPS limitations) crammed in one section → may overwhelm readers. * Flow: Switches between problem, motivation, and technical justification without smooth transitions. * Data sourcing: WHO statistic is cited but not referenced (year missing). * Repetition: Mentions interference issues multiple times; could be more concise. Overall: Very comprehensive and well-researched, but a bit text-heavy. With some restructuring (split into clear subsections, simplify wording), it could easily be a 9 or 10.	
7.00%	Slide Design		7	4.9	6.5	4.55	7.5	5.25	7	4.9	The slides are informative and clear, with well-designed diagrams/tables. Visual aids are used effectively, but there are moments where the design could be more polished or engaging. The presentation follows a logical sequence, but minor adjustments could improve flow.	12.00%	Literature Review		8.5	10.2	8.5	10.2	9	10.8	8	9.6	A solid, well-researched literature review section with excellent technical content and integration into your project. With smoother writing, more concise summaries, and polished figure handling, it could reach 9-9.5/10.	
7.00%	Presentation Content		7	4.9	6	4.2	7.5	5.25	7	4.9	The presentation covers most key aspects of the project effectively. The problem statement is clear, and the project scope is adequately defined. The objectives are appropriate, and the content flows logically. The tools and methodologies are identified but could benefit from more detailed explanation or context.	8.00%	Proposed Method / Approach		6	4.8	8.5	6.8	9	7.2	8	6.4	The tone is slightly conversational; for a thesis or formal report, it should be more objective and concise. Some sentences are long and wordy (e.g., "Also, you need a powerful laptop..." could be rephrased formally). Breaking into numbered subsections or bullet points (Funding, Hardware, Dataset, Integration) would make it easier to follow. Depth on integration challenges: The section could include more details on thread synchronization or error handling approaches. Citing similar projects or known implementation hurdles would strengthen credibility. The timeline is well-structured, covering all project phases with measurable milestones and clear alignment to academic workflows. However, it could benefit from a Gantt chart for clarity, more specific task descriptions, explicit parallel workflows, and added contingency planning. Consistent phrasing would further enhance professionalism and readability.	
3.00%	Presentation Question and Answer Session		6	1.8	7.5	2.25	6	1.8	7.5	2.25	Presenters answered most questions, but some responses were incomplete or lacked depth. A few questions may have been answered in part or left ambiguous, requiring follow-up.	5.00%	Preliminary Work (Result)		8.5	4.25	9	4.5	6	3	8	4	QR Code Detection Module - Could include a visual figure or pseudo-code snippet to illustrate pipeline flow. QR Code Reader Module - Needs more visuals (besides screenshots) or brief code insights to better demonstrate decoding logic. Writing could be slightly more concise. Path Planning & Visualization Module - Could benefit from performance benchmarks in diverse scenarios (not just 5m range). Adding diagrams of graph representation would strengthen clarity. Accessible User Interface Module - Could elaborate on user testing outcomes (e.g., ease of use for VI users) and give a clearer picture of UI layout.	
10.00%	Preliminary Work (Result)		8	8	8	8	8	8	8	8	Good progress has been made with clear steps toward the final project. Software development is mostly functional, with some elements still needing refinement. Recommendation: Refine the software development, and focus on completing any unfinished elements to ensure readiness for project completion.	2.00%	Conclusion		9	1.8	8.5	1.7	9	1.8	0	0	Would benefit from quantitative metrics (e.g., accuracy percentages) to strengthen the summary. Could include a brief mention of team contributions to emphasize collaborative effort.	
10.00%	Innovations and/or Contributions		8	8	8	8	8	8	8	8	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant.	5.00%	Presentation		7.43	3.71	7.20	3.60	7.75	3.88	7.58	3.79

PRESENTATION											REPORT 1										
Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark
3.00%	Presenter's General Preparation	7	2.1	7	2.1	6.5	1.95	7	2.1	The presenters were generally well-prepared, with most technical terms used correctly. The presentation was clear and concise, but a few areas could benefit from further explanation or additional detail. The overall flow was good, but some moments felt rushed or unclear.	3.00%	Introduction	8	2.4	7.5	2.25	8	2.4	7.5	2.25	Clear problem statement and well-structured motivation. Good coverage of significance and contributions. Could further strengthen conceptual framework with explicit links to variables and objectives.
7.00%	Slide Design	6	4.2	6	4.2	6.5	4.55	6	4.2	The slides are somewhat informative but lack clarity or attractiveness in visuals. Some visual aids are used, but they do not always enhance the overall presentation. The sequence of elements is generally followed, but some transitions or structure could be improved.	12.00%	Literature Review	7	8.4	7.5	9	7.5	9	7	8.4	Adequate and relevant references; good mix of classical and modern approaches. Needs more critical analysis and comparison across studies. Include more recent works from 2023–2024 to stay current.
7.00%	Presentation Content	7.5	5.25	7.5	5.25	7.5	5.25	7.5	5.25	Provide more context on the tools and methodologies, ensuring that all aspects of the project are fully explained.	8.00%	Proposed Method / Approach	8	6.4	8	6.4	8	6.4	7.5	6	Clear and feasible methodology with detailed design specs and system overview. Good coverage of accessibility and implementation challenges. Could add risk assessment and testing plans for stronger rigor.
3.00%	Presentation Question and Answer Session	10	3	8	2.4	8	2.4	7	2.1	Most presenters answered all questions, but some responses lacked detail or depth. While most answers were clear, a few could have been more thoroughly explained to increase understanding.	5.00%	Preliminary Work (Result)	5	2.5	5	2.5	5	2.5	5	2.5	Minimal implementation progress; coding work details are placeholders. Future drafts should include screenshots, code snippets, or early testing results to show ~30% progress.
10.00%	Preliminary Work (Result)	7.5	7.5	7.5	7.5	7.5	7.5	7.5	7.5	Good progress has been made with clear steps toward the final project.											
10.00%	Innovations and/or Contributions	7	7	7	7	7	7	7	7	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant.	5.00%	Presentation	7.26	3.63	7.11	3.56	7.16	3.58	7.04	3.52

PRESENTATION		2206600		2206732		2206147		REPORT 1		2206600		2206732		2206147								
Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	
3.00%	Presenter's General Preparation	8	2.4	8	2.4	8	2.4	0	0	The presenters were well-prepared, using technical terms correctly for the most part. The presentation was clear and concise, though some areas could have benefited from further explanation or additional details. While the overall flow was strong, a few sections felt rushed or lacked clarity.	3.00%	Introduction	8	2.4	8.5	2.55	8	2.4		0	The problem statement is clear, and the motivation for the project is well articulated. The conceptual framework is presented with a clear explanation of the challenges visually impaired individuals face. However, the relationship between the QR codes, obstacle detection, and real-time feedback could be expanded upon for a more in-depth understanding.	
7.00%	Slide Design	7.5	5.25	8	5.6	6.5	4.55	0	0	Polish the slide design to improve engagement and ensure the flow is seamless across all sections.	12.00%	Literature Review	8	9.6	8	9.6	7.5	9		0	The literature review is comprehensive and includes relevant references. The review also discusses various QR-based systems and technologies in detail. However, the critical evaluation of these technologies, especially their limitations, could be deeper, particularly regarding scalability and real-world application in varying environments.	
7.00%	Presentation Content	7.5	5.25	8	5.6	7.5	5.25	0	0	Include more details on the tools and methodologies, ensuring a comprehensive explanation of all aspects of the project.	8.00%	Proposed Method / Approach	8.5	6.8	8.5	6.8	8	6.4		0	The method is clearly described, with appropriate use of QR code technology, obstacle detection, and voice feedback. The system's components are well thought out, with attention to real-world challenges. However, the feasibility in handling poor lighting conditions and mobile hardware limitations could be discussed further.	
3.00%	Presentation Question and Answer Session	10	3	10	3	8	2.4	0	0	Excellent job during the Q&A session! All questions were answered clearly and thoroughly, showing a solid grasp of the material and addressing the audience's concerns effectively.	5.00%	Preliminary Work (Result)	5	2.5	5.5	2.75	5.5	2.75		0	There is a solid start, but the preliminary work is limited, and the integration of hardware and software is still in its early stages. More progress is needed to demonstrate how well the QR scanning, obstacle detection, and guidance system work together in real-time scenarios.	
10.00%	Preliminary Work (Result)	8	8	8	8	8	8	0	0	Good progress has been made with clear steps toward the final project.			2.00%	Conclusion	0	0	0	0	0	0		
10.00%	Innovations and/or Contributions	7.5	7.5	7.5	7.5	7.5	7.5	0	0	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant.	5.00%	Presentation	7.85	3.93	8.03	4.01	7.53	3.76	0.00	0.00

PRESENTATION											REPORT 1												
Mark Allocation	Key Assessment		Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment		Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark
3.00%	Presenter's General Preparation		7	2.1	7.5	2.25	7	2.1	6.5	1.95	Work on explaining technical terms clearly, refine the structure of the presentation for better flow, and make sure to focus on key points while avoiding unnecessary details.	3.00%	Introduction		7	2.1	7	2.1	7.5	2.25	7	2.1	Problem statement is clear, and objectives are defined. However, the conceptual framework could be strengthened by explicitly linking variables to objectives and including more justification for using QR codes over alternatives.
7.00%	Slide Design		8	5.6	8	5.6	8	5.6	8	5.6	The slides are informative and clear, with well-designed diagrams/tables. Visual aids are used effectively, but there are moments where the design could be more polished or engaging. The presentation follows a logical sequence, but minor adjustments could improve flow.	12.00%	Literature Review		6.5	7.8	6.5	7.8	6.5	7.8	6	7.2	Adequate sources and comparisons are presented, but critical analysis is limited. Some sections are descriptive rather than evaluative. Including more up-to-date works and synthesizing insights across studies would improve depth.
7.00%	Presentation Content		8	5.6	8	5.6	8	5.6	8	5.6	The presentation effectively covers key aspects of the project. The problem statement is clear, scope defined, and objectives appropriate. The content flows logically, and while tools and methodologies are identified, they could benefit from further detail and context.	8.00%	Proposed Method / Approach		8	6.4	8	6.4	7.5	6	7.5	6	Methods are clearly described with system modules and flow explained well. Challenges are discussed appropriately. Feasibility is reasonable, but more details on user testing, scalability, and error handling would strengthen the approach.
3.00%	Presentation Question and Answer Session		9	2.7	10	3	9	2.7	6	1.8	Excellent job during the Q&A session! All questions were answered clearly and thoroughly, showing a solid grasp of the material and addressing the audience's concerns effectively.	5.00%	Preliminary Work (Result)		6.5	3.25	6.5	3.25	6.5	3.25	6.5	3.25	Coding modules are provided and functional, showing progress. However, results remain at an early stage with limited validation. More integration between modules and evidence of working prototypes would be beneficial.
10.00%	Preliminary Work (Result)		8	8	8	8	8	8	8	8	Significant progress has been made with clear steps towards completing the final project.		2.00%	Conclusion		7	1.4	7	1.4	7	1.4	7	1.4

UCCC2513 Group 17 - Presentation 1

PRESENTATION											REPORT 1										
Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark
3.00%	Presenter's General Preparation	8	2.4	7.5	2.25	7.5	2.25	0	0	Well-prepared, mostly clear, minor improvements needed.	3.00%	Introduction	8	2.4	8	2.4	8	2.4		0	The problem statement is clearly articulated and relevant. The motivation for developing the system is strong, but the conceptual framework could be more detailed in explaining how the variables interact with each other. Additionally, explicit identification of specific variables related to navigation and interaction would improve clarity.
7.00%	Slide Design	7	4.9	7	4.9	7	4.9	0	0	The slides are informative and clear, with well-designed diagrams/tables. Visual aids are used effectively, but there are moments where the design could be more polished or engaging. The presentation follows a logical sequence, but minor adjustments could improve flow.	12.00%	Literature Review	7	8.4	7	8.4	7	8.4		0	The literature review includes several relevant and recent sources, but lacks critical evaluation of the technologies reviewed. There is a decent variety of technologies, but a deeper analysis of their advantages and limitations would strengthen the argument for the proposed system.
7.00%	Presentation Content	7.5	5.25	7.5	5.25	7.5	5.25	0	0	Provide more context on the tools and methodologies, ensuring that all aspects of the project are fully explained.	8.00%	Proposed Method / Approach	8.5	6.8	8	6.4	8	6.4		0	The methods and tools are clearly described, and the approach seems well thought out. The use of QR codes, AI voice guidance, and haptic feedback is well aligned with the project objectives. However, more detailed explanations of the system's feasibility and possible challenges could further improve the approach.
3.00%	Presentation Question and Answer Session	10	3	8	2.4	6	1.8	0	0	Expand on some answers for greater clarity and depth, ensuring the audience fully understands the responses.	5.00%	Preliminary Work (Result)	6	3	6	3	6	3		0	The preliminary work demonstrates solid effort, but the results are somewhat limited in scope for FYPI. While progress has been made in setting up the infrastructure and system requirements, a clearer demonstration of the hardware and software components' integration would be beneficial.
10.00%	Preliminary Work (Result)	8	8	8	8	8	8	0	0	Good progress has been made with clear steps toward the final project.											
10.00%	Innovations and/or Contributions	8	8	8	8	8	8	0	0	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant.	5.00%	Presentation	7.89	3.94	7.70	3.85	7.55	3.78	0.00	0.00

PRESENTATION											REPORT 1												
Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark		
3.00%	Presenter's General Preparation	7.5	2.25	6	1.8	7	2.1	6.5	1.95	* Liew Ji Wen audio was too soft and cannot be heard properly	3.00%	Introduction	8	2.4	8.5	2.55	8	2.4	7.5	2.25	The problem statement is clear, and the motivation is strong. The use of QR codes for navigation is well-justified. However, the conceptual framework could benefit from more clarity on how the system integrates the different components, especially regarding obstacle detection and real-time feedback.		
7.00%	Slide Design	7.5	5.25	7.5	5.25	7.5	5.25	7.5	5.25	The slides are clear and informative with well-designed visuals. Visual aids are effective, but the design could be more engaging. The content follows a logical sequence, though minor adjustments could enhance flow.	12.00%	Literature Review	8	9.6	7.5	9	8	9.6	8	9.6	The literature review covers a wide range of relevant topics, including QR code recognition, indoor navigation for the visually impaired, and obstacle detection techniques. There is some depth in critical analysis, but a more detailed comparison of existing solutions and their limitations would enhance the review.		
7.00%	Presentation Content	7.5	5.25	6	4.2	7.5	5.25	7	4.9	The presentation effectively covers key aspects with a clear problem statement and defined scope. Objectives are appropriate, and tools and methodologies could benefit from more detailed explanation.	8.00%	Proposed Method / Approach	8	6.4	8.5	6.8	8	6.4	8.5	6.8	The proposed method is well-defined, with clear explanations of how the system will use QR codes, mobile sensors, and multimodal feedback for navigation. However, more detail on how the system will handle different lighting conditions and obstacles would strengthen the feasibility discussion.		
3.00%	Presentation Question and Answer Session	9	2.7	7	2.1	7	2.1	6	1.8	Presenter 4 should provide more detailed answers and ensure all questions are addressed fully. If necessary, ask for clarification to better address the audience's queries.	5.00%	Preliminary Work (Result)	6	3	6.5	3.25	6	3	6	3	The preliminary work shows an early-stage system with some progress, but the integration of hardware and software is still lacking. There are no concrete results demonstrated yet, and more testing and development are needed to show how well the system functions in real-world conditions.		
10.00%	Preliminary Work (Result)	7	7	6	6	6.5	6.5	7	7	Focus on demonstrating functionality to ensure the project is on track for project completion.													
10.00%	Innovations and/or Contributions	7	7	7	7	7	7	7	7	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant	2.00%	Conclusion	7.5	1.5	7.5	1.5	7	1.4	7.5	1.5	The conclusion highlights the main objectives and potential impact of the project. However, the discussion on the system's real-world applicability could be expanded. Also, there is a lack of detailed evidence or data to back up the claims made.

PRESENTATION		2301442		2202823		2202639		REPORT 1		2301442		2202823		2202639							
Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark
3.00%	Presenter's General Preparation	7.5	2.25	7.5	2.25	7.5	2.25	0	0	Expand on key points where necessary, slow down in sections that may need more detail, and ensure technical terms are explained with clarity.	3.00%	Introduction	8	2.4	8	2.4	8.5	2.55	0	The problem statement is well-articulated, highlighting key challenges faced by visually impaired individuals in indoor navigation. The conceptual framework is clearly defined, but a more explicit discussion of the interaction between the variables (QR codes, route guidance, and user behavior) would strengthen the section.	
7.00%	Slide Design	7.5	5.25	6.5	4.55	7	4.9	0	0	Refine the slide design to enhance engagement and ensure a smooth, seamless flow throughout all sections of the presentation.	12.00%	Literature Review	7.5	9	7.5	9	7	8.4	0	The review includes a good range of relevant and recent sources. However, while various technologies are discussed, the critical evaluation of these sources could be improved. For instance, a deeper comparative analysis between QR code-based systems and other alternatives would be beneficial.	
7.00%	Presentation Content	8	5.6	8	5.6	8	5.6	0	0	The presentation effectively covers key aspects of the project. The problem statement is clear, scope defined, and objectives appropriate. The content flows logically, and while tools and methodologies are identified, they could benefit from further detail and context.	8.00%	Proposed Method / Approach	8	6.4	8	6.4	8.5	6.8	0	The method is well-described, and the use of RAD methodology aligns well with the project's scope. However, more details on the system's feasibility, especially concerning QR code detection in diverse indoor environments, would make the approach more robust.	
3.00%	Presentation Question and Answer Session	7	2.1	8	2.4	9	2.7	0	0	The presenter answered all questions, but some responses lacked detail or depth. While most answers were clear, a few could have been more thoroughly explained to increase understanding.	5.00%	Preliminary Work (Result)	6	3	6	3	6	3	0	The preliminary work shows some effort, but the results are still in early stages. There is limited demonstration of integrated hardware and software. More progress is needed, especially in combining the modules into a functional system.	
10.00%	Preliminary Work (Result)	7	7	7	7	7	7	0	0	Significant progress has been made with clear steps towards completing the final project.		2.00%	Conclusion	7	1.4	7.5	1.5	7	1.4	0	The conclusion addresses the project's objectives and impact, but the supporting details are somewhat brief. More specific evidence and reflections on potential challenges and solutions would strengthen the final remarks.
10.00%	Innovations and/or Contributions	7	7	7	7	7	7	0	0	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant	5.00%	Presentation	7.30	3.65	7.20	3.60	7.36	3.68	0.00	0.00

Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark
3.00%	Presenter's General Preparation	7.5	2.25	6	1.8	6	1.8	7	2.1	Basic preparation, some misused terms, unclear points.	3.00%	Introduction	8	2.4	8	2.4	8	2.4	8.5	2.55	The problem statement is clear, and the motivation is well-explained. The proposal for a QR code-based navigation system is justified with practical benefits. However, the conceptual framework could benefit from a more detailed explanation of how QR codes, obstacle detection, and feedback systems work together.
7.00%	Slide Design	8	5.6	7.5	5.25	7	4.9	0	0	The slides are clear and informative with well-designed visuals. Visual aids are effective, though the design could be more engaging. The content follows a logical sequence.	12.00%	Literature Review	8	9.6	8	9.6	7.5	9	7.5	9	The literature review covers a wide range of relevant technologies, including QR code recognition, indoor navigation, and obstacle detection for the visually impaired. However, more critical analysis of existing systems and technologies would strengthen the comparison, especially on their limitations and applicability to real-world conditions.
7.00%	Presentation Content	7.5	5.25	7.5	5.25	7.5	5.25	7.5	5.25	Provide more context on the tools and methodologies, ensuring that all aspects of the project are fully explained.	8.00%	Proposed Method / Approach	8	6.4	8	6.4	8.5	6.8	8.5	6.8	The proposed method is clearly described, and the system design appears well-thought-out with a clear path for integration. The system's use of QR code-based navigation and multimodal feedback is appropriate. However, the discussion on how the system handles varying lighting conditions and obstacles in real-time could be expanded.
3.00%	Presentation Question and Answer Session	9	2.7	5	1.5	0	0	6	1.8	Presenter 3 was absent during Q&A session. Presenter 1 answered all questions completely and clearly, demonstrating a deep understanding of the topic. Presenter 2 and 4 answered most questions, but some responses were incomplete or lacked depth. A few questions may have been answered in part or left ambiguous, requiring follow-up.	5.00%	Preliminary Work (Result)	6	3	6	3	6	3	6.5	3.25	While there is some progress, the preliminary work lacks substantial testing and integration between hardware and software. The system's early-stage setup is acknowledged, but further development and testing, especially in real-world environments, are needed to show effectiveness.
10.00%	Preliminary Work (Result)	8	8	8	8	8	8	8	8	Good progress has been made with clear steps toward the final project.		Conclusion	7.5	1.5	7.5	1.5	7.5	1.5	7	1.4	The conclusion summarizes the project objectives well and outlines the potential impact on visually impaired users. However, it could be more detailed, particularly in discussing how the system meets its goals and addresses challenges faced during implementation.
10.00%	Innovations and/or Contributions	7	7	7	7	7	7	7	7	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant	5.00%	Presentation	7.70	3.85	7.20	3.60	6.74	3.37	6.04	3.02

PRESENTATION											REPORT 1										
Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark	Mark Allocation	Key Assessment	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Scale (0.0) to (10.0)	Marks	Remark
3.00%	Presenter's General Preparation	7	2.1	7	2.1	7	2.1	0	0	The presenters were well-prepared, using technical terms correctly. The presentation was clear, but some areas needed more detail or clarity	3.00%	Introduction	8	2.4	8.5	2.55	8	2.4		0	The problem statement is well-defined, and the motivation for the project is clear. However, the conceptual framework could be elaborated further to explain the integration of variables such as QR codes, pathfinding, and obstacle detection. More explanation on how the system overcomes existing limitations would strengthen this section.
7.00%	Slide Design	8	5.6	6.5	4.55	6	4.2	0	0	The slides are somewhat informative but lack clarity or attractiveness in visuals. Some visual aids are used, but they do not always enhance the overall presentation. The sequence of elements is generally followed, but some transitions or structure could be improved.	12.00%	Literature Review	7.5	9	7	8.4	7.5	9		0	The literature review covers a wide range of relevant technologies and solutions, but it could benefit from a deeper critical evaluation of the methods. While the review presents good sources, the connection between different approaches (e.g., RFID vs QR codes) could be clearer in terms of strengths and weaknesses.
7.00%	Presentation Content	7	4.9	7	4.9	7	4.9	0	0	The presentation effectively covers key aspects with a clear problem statement, defined scope, and appropriate objectives, but tools need more explanation.	8.00%	Proposed Method / Approach	8.5	6.8	8	6.4	8	6.4		0	The proposed approach is well-defined with a clear description of the system's components and functionalities. The use of multiple technologies (QR codes, computer vision, voice guidance) is appropriate for the objectives. However, further discussion of the feasibility and real-world challenges, especially around lighting and camera quality, would enhance the approach.
3.00%	Presentation Question and Answer Session	8	2.4	8	2.4	8	2.4	0	0	Expand on some answers for greater clarity and depth, ensuring the audience fully understands the responses.	5.00%	Preliminary Work (Result)	6	3	6	3	6	3		0	The preliminary work is somewhat limited, showing initial progress but lacking substantial integration of hardware and software. There is room for more original implementation effort and testing results to demonstrate the system's viability.
10.00%	Preliminary Work (Result)	7.5	7.5	7.5	7.5	7.5	7.5	0	0	Good progress has been made with clear steps toward the final project.											
10.00%	Innovations and/or Contributions	7	7	7	7	7	7	0	0	The project is innovative and useful, addressing the problem statement and objectives well. It demonstrates creativity, and the scope is relevant	5.00%	Presentation	7.38	3.69	7.11	3.56	7.03	3.51	0.00	0.00
